Bandi Uday Teja

budayteja009@gmail.com | +91-8142099823

EDUCATION

GNIT
B. Tech., CSE
2016-20 | Hyderabad, India
CGPA: 6.50 / 10.0

NARAYANA JR COLLEGE
12TH CLASS
90.3 | Hyderabad, India

SKILLS

PROGRAMMING
Languages:
• NodeJS • Javascript
• Typescript • Java

Frameworks:
• Express • Jest • Angular

Web Technolgies:
• HTML • CSS

Databases:
• MySQL • MongoDB

PROFILE LINKS

MAX RATINGS

LeetCode: **3 Star**

COURSEWORK

Data Structures and Algorithms
Database Management
Object Oriented Programming
Operating System

INTERESTS/ HOBBIES

• Cricket
• LeetCode
• Reading Engineering Blogs

WORK EXPERIENCE

NEODOVE BY VYAPAR | SOFTWARE DEVELOPMENT ENGINEER 1
Oct 2022 – Mar 2023 | Bangalore, India

- **Optimized slow SQL queries**, resulting in a **40%** reduction in query execution time, significantly improving application responsiveness and user experience.
- Designed Incoming Softphone Feature which helps users to pick the call from customers directly from website.
- Redesigned system and schema for creating logs using Typescript.
- Implemented Internet Connection lost/restore on website which helps users to identify their internet connectivity.

NESTOR ANALYTICS | SOFTWARE ENGINEERING INTERN
May 2019 – July 2019 | Bangalore, India

- Developed and deployed backend APIs using Node.js, Express, and MongoDB.
- Gained experience in all aspects of the Node.js backend development lifecycle, from planning and design to implementation and testing.
- Worked on a team of developers to build a production-ready backend application.
- Successfully completed all assigned tasks on time.
- Received positive feedback from supervisor for consistently meeting deadlines and exceeding expectations.

PROJECTS

URL SHORTENING

- Gained experience in all aspects of the URL shortening application development lifecycle, from planning and design to implementation and testing.
- Successfully deployed the URL shortening application to vercel.
- **Tech stacks used**: Javascript, NodeJS, MongoDB, GIT

CRM APPLICATION

- Developed a CRM application from the ground up using Node.js, JavaScript, and MongoDB
- Ensured data security by implementing a robust user authentication system and role-based access control.
- **Tech stacks used**: Javascript, NodeJS, MongoDB, GIT

PROGRAMMING ACHIEVEMENTS

-Won MacBook Air from Relevel
-Rank 1 in Relevel Backend Development Test
-10/120 in Scaler Contest
-500+ problems solved over Scaler
-1500+ total GitHub contributions
